

Governed controls preserve success and eliminate unsafe actions

GATED vs UNGATED · 50 frozen paired tasks · deterministic local supplier-invoice runtime

Task success GATED 100% UNGATED 46% Higher is better	Unsafe actions GATED 0% UNGATED 46% Lower is better	Contract violations GATED 0% UNGATED 44% Lower is better
---	--	---

Control and safety outcomes

Takeaway: GATED keeps 100% task success while unsafe actions and contract violations fall to 0%.

Measured local execution cost

Mean latency (ms)

GATED – UNGATED: -53.938 ms (faster in this local run)

Mean tool-call attempts per task

No model calls or external actions; latency is local and descriptive.
